# ACUTE CARDIOVASCULAR CARE2014

Dear Colleagues and Friends,

We would like to invite you to attend Acute Cardiovascular Care 2014! The theme of the third official congress of the Acute Cardiovascular Care Association will be "The Highly Vulnerable Patient".

At the heart of every congress is the scientific programme, the main reason why people get together to meet, exchange ideas and learn. Acute Cardiovascular Care is a unique meeting because the content is for cardiologists, emergency care physicians, intensive care physicians, internists, surgeons, imaging specialists, interventionalists, nurses, paramedics.

During the three day meeting, experts will discuss and present fascinating achievements and developments in the field. Topics that we are sure to cover: the golden early hours (time to reperfusion - time to cooling) of acute cardiac care, AMI patients with a normal angiogram and how they should be treated, updates on cardiac arrest, acute chest pain pre- and in-hospital management; acute heart failure, cardiogenic shock and more...

With more than 40 high quality scientific sessions - main symposia, how to sessions, challenging cases, debates, joint sessions, abstract sessions with incentives for our young researchers, specific educational tracks for young professionals including case sessions presented by residents and more, the congress should become the natural interactive forum for all.

Geneva was carefully chosen as host city not only for its location on Lake Geneva at the foot of the Alps, but also for being close to the European Headquarters of the United Nations (UN) the World Heart Federation (WHF), the World Health Organisation (WHO) and the Red Cross.

We are looking forward to welcoming all of you to the Acute Cardiovascular Care Congress in Geneva.

**Peter Clemmensen**, President of the Acute Cardiovascular Care Association  
**Hector Bueno**, President Elect, Acute Cardiovascular Care Association  
**Maddalena Lettino**, Congress Committee Chair  
**Christian Mueller**, Local Organiser
